DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of the amendment filed 08/16/2005.
2. Claims 1-4 and 6-21 are pending, and claim 5 is cancelled.

Response to Arguments

3. Applicant's arguments filed 08/16/2005 have been fully considered but they are not persuasive. In response to the applicant argument that Gaukel's lamp 82 is incapable of illuminating the interior of the cellular bag because of the location, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 6-7, 9-10, 13-15 and 18, and 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gaukel (US 6,100,806).

Re claims 1, 6-7, 9, and 20-21: Gaukel discloses a receptacle system (30) for powering an electronic device (32 in Fig. 4), the system comprising; a receptacle having an interior

Art Unit: 2875

compartment; interfacing means (col. 14, lines 4-7) for interfacing with the electronic device (32); processing mean (36) on the receptacle for processing signals from the electronic device (32) received through the interfacing means and powering means (38 and 58) mounted on the receptacle for powering the electronic device. Further, Gaukel discloses illuminating means (82) and alarm means (col. 15, lines 52-53) that emits an audible sound.

Re claims 2-4 and 18: Gaukel discloses a rechargeable battery and a battery charger (col. 15, lines 59-61).

Re claim 10: Gaukel discloses a microphone (23 in Fig. 7).

Re claims 13-15: Gaukel discloses an antenna (35), a GPS system (32) and telecommunication means (34).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaukel as applied to claim 1 above, and further in view of Miyashita (US 6,226,536 B1).

Re claims 8 and 16-17: Gaukel does not disclose a silent alarm such as a vibrator. However, Miyashita teaches a vibrator(29 in Fig. 2) in a mobile phone. It would have been obvious to one having ordinary skill in the art at the time of the invention to employ a vibrator into Gaukel's cellular phone (34) as taught by Miyashita in order to give silent alarm to the user.

Art Unit: 2875

7. Claim 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gaukel as applied to claim 1 above, and further in view of Leibowitz (US 6,132,059).

Re claim 11-12: Gaukel does not disclose a display screen. Leibowitz teaches a display screen (30 in Fig. 1) mounted on the receptacle. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Gaukel's receptacle to include Leibowitz' display in order to display the signal from the GPS.

Allowable Subject Matter

8. Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

With regard to claim 19, the prior art of record does not disclose a receptacle system, configured as claimed, comprising a global positioning satellite receiving system being mounted on the receptacle and being operably connected to a processing means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
